JODHA TRANSPORT & LOGISTICS

Authored by: Harry Rathour

31 MARCH 2026

Company Overview

Jodha Transport & Logistics is a **family owned** and **operated** national transport and logistics provider of **bulk haulage, transport** and **end-to-end** logistics solutions. Established by the Jodha Group in 2021, Jodha Transport & Logistics is led by a CEO with more than 15 years of transport and logistics experience, providing strong industry knowledge from day one.

With the leadership of a CEO who brings over **15 years** of operational experience, Jodha Transport & Logistics delivers reliable, safe and technology-enabled transport services that support civil construction, commercial projects, government contractors and industrial operations across metro and regional Australia.

As a established company within the Jodha Group, our goal is to build a reputation as one of the safest and most dependable transport service providers in our chosen markets, growing responsibly and sustainably year on year.

Our personalised and customer-focused approach ensures clients receive consistent, reliable service tailored to their operational needs. Our commitment to safety, reliability, and customer satisfaction forms the foundation upon which Jodha Transport & Logistics is steadily establishing its presence within the industry.

Our Vision

To become the most reliable and trusted transport company in the industry, founded on principles of unwavering quality, exceptional service, and genuine partnership.

Our Core Values

- **Safety First**: Every load, every journey.
- **Service Excellence**: Responsive support and clear communication.
- **Reliability**: Fast, on-time delivery you can depend on.
- **Partnership**: Building long-term client relationships through trust and performance.

Transport and Logistics Capabilities

Dedicated Fleet Operations:

- **Bulk Haulage**
- **LTL and Express Services** - whether you have 1, 5, 14 or 34 pallets
- **Metro and regional deliveries** across Victoria and nationwide (mainland)
- **Multiple vehicle configurations** for bulk materials and specialised load requirements
- **Wind Farm Projects**
- High-capacity fleet allowing **scalable** support for large infrastructure projects.

End-to-End Logistics Management

- Route planning, scheduling and delivery coordination
- **Real-time tracking** and transparent communication
- Efficient turnaround times to minimise project delays
- Integrated fleet and **compliance systems** ensuring seamless operational flow

Key Clients (Jodha & Harry)

Location

- **Head Office:** 66 O'Grady Road, Hallam
- **Transport Depot:** Hallam, Victoria
- Strategically positioned to service Melbourne metro, regional Victoria and interstate freight routes.

Safety and Compliance

National Heavy Vehicle Accreditation Scheme (NHVAS)

The National Heavy Vehicle Accreditation Scheme (NHVAS) is a national formal process for recognising operators who have robust safety management systems in place. It is also increasingly being used to show compliance with general duty requirements under road transport law.

The NHVAS is managed by the National Heavy Vehicle Regulator (NHVR). NHVR commenced in 2013 as the single statutory regulator in Australia to administer one set of laws.

Jodha Group has the following **certification** with **NHVAS**:

1. Mass Management
2. Basic Fatigue Management

Mass Management and Basic Fatigue Management Accreditation

National Heavy Vehicle Accreditation Scheme

Certificate of Accreditation

NHVR

Accredited Operator

National Heavy Vehicle Accreditation Scheme

This is to certify that

JODHA ENTERPRISES PTY LTD

Accreditation Number: NHVAS322088

is accredited in the modules below:

Mass Management	**Expires: 19-Dec-2027**

Technology

Jodha Group utilises a suite of **software** and **systems** in the performance of the business as well as aiding its **compliance**.

Gearbox

Our main system for the management of fleet, maintenance, safety, compliance and quality management is Gearbox. Gearbox is a cloud-based software that integrates and manages fleet, accounts and telematics:

- Maintenance scheduling
- Driver training records and scheduling
- Driver licence expiry reminders
- Infringement and incident management
- Sub-contractor management

The driver app as part of the Gearbox suite includes:

- Pre and post trip inspections
- Fault reports
- Fitness for duty declarations
- Load and dimension checklists

Checklists are highly tailorable to the needs of the business and customer requests.

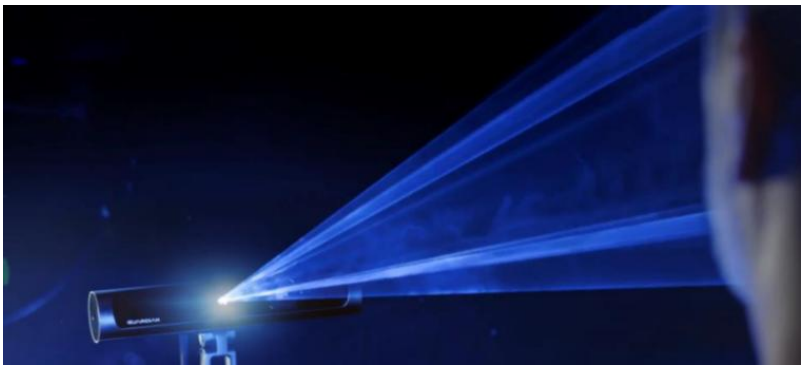
Telematics

Our telematics are connected via the CANBUS in the vehicle and provide real time feedback:

- GPS asset monitoring
- Real time speed alerts
- Review speed in <100km/hour zones
- Harsh braking alerts
- Remotely accessible real time drive camera monitoring
- Cloud based backup of data including drive camera

Guardian

The Guardian seeing machine in a Driver Monitoring System using Artificial Intelligence (AI) to determine distractions and driver fatigue related issues.



Guardian combines in-cab intervention with 24/7 support for commercial operations. The system uses face and eye tracking algorithms to measure a driver's eye closure and head position (Gaze Tracking) to ensure drivers situational awareness is maintained.

The real-time intervention provides immediate in-cab intervention to the driver when fatigue or distracted. Audio alarms and seat vibration alerts are activated instantaneously to warn the driver to re-focus their attention to the road.

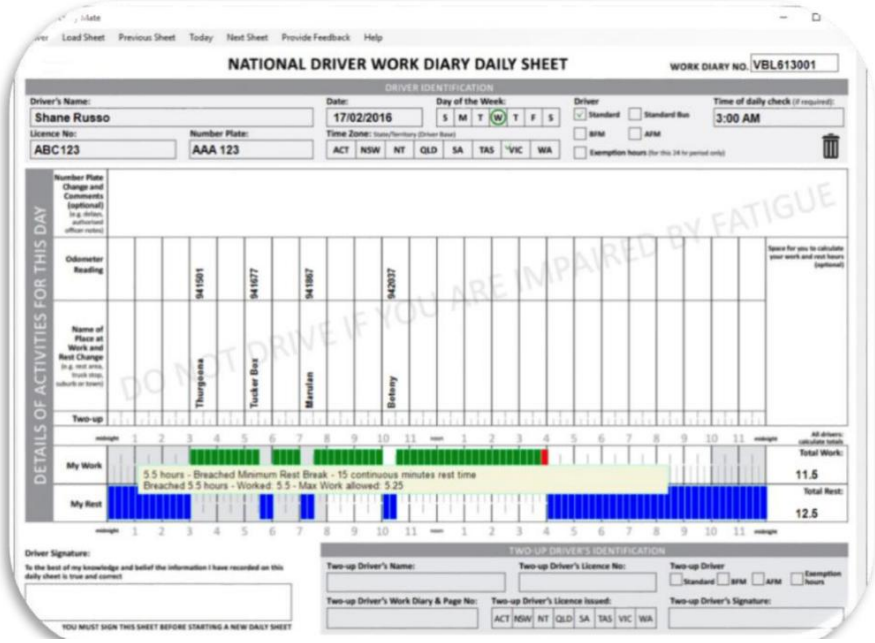
When an event is detected, a short clip of footage is immediately sent to the 24/7 Guardian Centre for review, who will notify the driver's manager within minutes.

The live portal provides secure access to all events captured and can analyse the data to determine the time of day and location risk.

Work Diary Mate

Work Diary Mate is an intuitive work diary assistant and logbook checker. The software is available on an App to use on mobile devices and is based on the Australian National Driver Work Diary for Heavy Vehicles.

Data from the App can be downloaded in real time in the office for compliance checks and signed off by managers to ensure fatigue management rules are followed in accordance with our NHVAS fatigue management accreditation.



TN 360

Jodha Group uses TN360 for TMS. TN 360 is a cloud-based software that is used to managed POD's, invoicing and ePOD's.

Why us?

Over 15 Years of Industry Expertise
Although Jodha Transport & Logistics is newly established, our leadership brings more than 15 years of hands-on transport and logistics experience. This ensures every project benefits from proven industry knowledge, practical capability, and reliable decision-making from day one.

Safety-Driven Operations
Safety underpins every aspect of our operations. From NHVAS-accredited systems to advanced driver monitoring technology, we operate with stringent compliance and a commitment to safeguarding people, freight, and our customers' reputations.

Reliable, Australia-Wide Delivery
Our modern fleet and expanding logistics network enable efficient, dependable delivery across metropolitan, regional, and interstate routes. We prioritise punctuality, communication, and operational consistency to keep your projects on track.

Technology-Enabled Transparency
With real-time tracking, telematics, digital compliance tools, and electronic delivery records, customers receive full visibility across every movement — improving scheduling, reducing disruptions, and strengthening supply chain performance.

Tailored Service for Every Project
We work closely with customers to understand their operational needs and project constraints. Our personalised approach ensures flexible solutions, responsive communication, and dependable support at every stage.

Growing With You
As a newly established but strongly backed business within the Jodha Group, we are committed to long-term partnerships and sustainable growth, ensuring we can scale alongside your project requirements.
